- **Tools & Platforms:** ServiceNow, Jira, Microsoft 365 Suite (Exchange Online, SharePoint, Teams), Remote Support Tools, Monitoring Solutions, Network Diagnostic Tools

Professional Experience

IT Support Coordinator Wedderburn

*September 2023 to Present
Greater Sydney Area*

- Provide Level 3/4 technical support for enterprise IT infrastructure, managing complex escalations involving Active Directory, Windows Server, network connectivity, and system administration across multiple sites.
- Administer Windows Server 2019/2022 infrastructure including domain controllers, file servers, print servers, and application servers, performing system maintenance, patch management, and performance optimization.
- Manage Active Directory environment including user and group provisioning, security group assignments, Group Policy creation and troubleshooting, organizational unit management, and access control enforcement.
- Troubleshoot advanced network issues including DNS resolution failures, DHCP scope management, VPN connectivity problems, routing issues, and inter-site network communication using diagnostic tools and packet analysis.
- Configure and maintain enterprise network infrastructure including managed switches, VLANs, firewall policies, and network security controls to ensure optimal performance and security compliance.

- Perform PowerShell scripting for automation of administrative tasks including bulk user management, system health monitoring, automated reporting, and routine maintenance procedures.
- Lead incident response for critical infrastructure outages, coordinating with vendors and internal teams to minimize downtime and restore services within SLA requirements.
- Administer Microsoft 365 tenant including Exchange Online mailbox management, SharePoint site administration, Teams configuration, and conditional access policies for cloud services.
- Manage endpoint security including antivirus deployment, security patch verification, vulnerability remediation, and compliance monitoring across all workstations and servers.
- Conduct root-cause analysis for recurring incidents and implement preventive measures to improve system reliability and reduce future incidents.
- Maintain comprehensive technical documentation including server configurations, network diagrams, standard operating procedures, and disaster recovery plans.
- Mentor junior support staff on advanced troubleshooting techniques, system administration best practices, and escalation procedures.

Supervisor

February 2019 to September 2023

Woolworths Group

Australia

- Supervised operational team of 20+ staff members, managing daily workflows, scheduling, and performance coordination over a 4+ year tenure.
- Provided first-line technical support for point-of-sale systems, network connectivity issues, and operational software during business operations.
- Coordinated with IT support team for system maintenance, hardware troubleshooting, and software updates, documenting technical issues for escalation.
- Trained new staff on technical systems and operational procedures, developing user-friendly documentation for common technical tasks.
- Demonstrated strong technical aptitude and problem-solving skills, leading to career transition into dedicated IT support role.

Education

Bachelor of Technology, Information Technology

2018 to 2021

Victoria University

Relevant Coursework: Network Administration, System Administration, Database Management, Cybersecurity, Operating Systems, IT Infrastructure, Network Security

Additional Information

- Full working rights in Australia with immediate availability
- Strong analytical and problem-solving abilities with focus on infrastructure optimization and automation
- Excellent communication skills with ability to explain complex technical concepts to non-technical stakeholders
- Proven ability to work independently and collaboratively in fast-paced, high-pressure environments
- Committed to continuous professional development through certifications and hands-on technical experience
- Available for on-call rotation and after-hours support as required
